

Sebastian Venegas

Full-Stack Engineer | Product Systems | Frontend Architecture

Greater Los Angeles Area

sebastianvenegas.dev • [GitHub](#) • [LinkedIn](#) • [X / Twitter](#)

SUMMARY

Product-focused full-stack engineer focused on modern web applications, payment systems, and AI-integrated product experiences. Experienced working across frontend architecture, scalable web systems, responsive UI development, and collaborative engineering workflows. Strong understanding of GitHub workflows, feature branching, pull requests, Jira-based collaboration, modern frontend systems, and product-focused development environments.

CORE COMPETENCIES

- **Frontend & Product Systems:** React, Next.js, TypeScript, Tailwind CSS, Framer Motion, responsive UI systems, frontend architecture
- **Backend & Infrastructure:** Node.js, PostgreSQL, REST APIs, Supabase, Vercel, AWS fundamentals
- **Payments & Commerce:** Stripe, Stripe Connect, payment workflows, onboarding systems, scalable checkout experiences
- **AI & Modern Tooling:** LLM integrations, Hugging Face, Cursor, GitHub, CodeRabbit, AI-assisted product workflows
- **Design & Collaboration:** Figma, UI/UX systems, Jira workflows, pull requests, feature branching, product architecture

PROFESSIONAL EXPERIENCE

Way of Glory Payments — Full-Stack Engineer

Jan 2025 — Present

- Contributed to payment platform architecture focused on Stripe Connect workflows and scalable product systems.
- Worked across frontend systems, onboarding experiences, dashboard workflows, and payment-focused web applications.
- Focused on scalable frontend architecture, responsive UI systems, and modern engineering workflows.

Dynamic Federal Solutions — Frontend Engineer

Jun 2023 — Present

- Contributed to frontend systems and responsive interface development across modern web workflows.

- Worked within collaborative engineering environments using GitHub workflows, pull requests, and feature branching.
- Focused on scalable UI systems, maintainable frontend architecture, and product-focused development.

SoundPlanet — Full-Stack Engineer

Aug 2025 — Dec 2025

- Contributed to modern event platform workflows, ticketing systems, and frontend architecture.
- Worked across payment integrations, authentication systems, and responsive product experiences.
- Focused on scalable frontend systems and thoughtful user interaction patterns.

CERTIFICATIONS

- Harvard CS50P — Introduction to Programming with Python (Harvard University / edX)

ENGINEERING FOCUS

Focused on frontend architecture, scalable web systems, payment infrastructure, and modern product-focused engineering workflows. Interested in AI-integrated systems, modern UI/UX experiences, and collaborative software engineering environments.
